Directions for use: MetaGrow™ ST Earthworm Compost Tea and can be applied through most irrigation systems, in transplant water, preplant seed treatment, dribbled over a seed line at planting, side dressed, sprayed on a berm, or water run in furrow irrigation. See product filter mesh size at the bottom of the label for application method compatibility. Use rates will vary from 1 gallon per acre up to 100 gallons per acre, depending on crop, the number of applications, and application timing. If injecting into an irrigation system, irrigate normally injecting the desired rate of MetaGrow™ ST. With other application methods, dilute the MetaGrow™ ST with 4 parts water (or more) for each part of MetaGrow™ ST. When soil applied, follow the application with additional water to ensure the MetaGrow™ ST is washed into the soil.
